DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1-8, 10, 12, 13, and 16-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Perry et al, US 6,368,359.

Perry et al teach a process for stabilizing dry cleaning solutions (see abstract). An example of such a process contacts an article with decamethylcyclopentasiloxane solvent, removes the solvent, contacts the solvent with salt solutions (pretreating), then separates and dries (purifying) the silicone solvent, and finally reuses the solvent (col. 4, example 1 and col. 10, claims 12-16). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

3. Claims 1-18, 20, and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Berndt et al, US 6,063,135.

Art Unit: 1751

Berndt et al teach a method for dry cleaning articles (see abstract). An example of such a process contacts an article with a composition comprising decamethylcyclopentasiloxane solvent, detergents, and stabilizers. During the cleaning process, the composition is continuously recycled by removing the solvent and passing it through a filter containing carbon or diatomaceous earth. After cleaning, the solvent is removed by centrifugation and heating, any resulting vapor is condensed for reuse. The used solvent is purified by vacuum distillation and the resulting purified solvent is ready for reuse (col. 8, steps 1-7). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles Boyer whose telephone number is (703) 308-2524. The examiner can normally be reached on Monday-Friday from 9:30 AM - 6:00 PM.

If reasonable attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra Gupta, can be reached on (703) 308-4708. The fax phone number for this Group is (703) 872-9310 for non-after-final amendments and (703) 872-9311 for after-final amendments.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0661.
